PROFILE

Computer Science Engineering student specialising in full-stack web development (MERN, React/Next.js) and applied machine learning. Industry experience at Netparam Technologies plus 15+ shipped projects spanning web, Android and ML — most deployed to production on Vercel. Focused on performant, accessible interfaces and clean, maintainable code.

EDUCATION

Jodhpur Institute of Engineering & Technology 2023 – Present
Bachelor of Technology in Computer Science & Engineering CGPA: 7.89

Kalpna Chawla International School, Nagaur 2023
Class XII – Senior Secondary (RBSE) Percentage: 69.8%

INTERNSHIP

Netparam Technologies Pvt. Ltd. May 2025 – July 2025
MERN Stack Developer Intern Jaipur, India

- Built end-to-end features for an e-commerce platform across the full MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented RESTful APIs, reusable React components, and integrated frontend with backend services.
- Collaborated on code reviews, Git-based workflows, and modern deployment practices.

PROJECTS

Personal Portfolio Website | *HTML5, CSS3, JavaScript, Three.js, Vercel*

Production portfolio with a 3D Three.js particle background, custom cursor with magnetic states, scroll-driven reveals, glassmorphism UI, animated SVG progress rings, and infinite tech ticker. Fully responsive, accessible, and deployed on Vercel with GitHub CI/CD. (mahipal-profile.vercel.app)

PetVerse | *TypeScript, React, Next.js, Vercel*

Full-stack pet-care platform connecting owners with services, products and a community — built with a modern TypeScript stack and deployed to production.

RecruitPro | *TypeScript, React, Next.js, Tailwind CSS*

Recruitment-management SaaS that streamlines job postings, candidate pipelines and HR workflows, designed with a clean dashboard UI.

News Reader AI | *TypeScript, React, Web Speech API*

AI-powered news reader frontend with article browsing, user profiles, AI responses and voice playback via the Web Speech API.

Health Prediction System | *Python, scikit-learn, Pandas, Jupyter*

Machine-learning notebooks that predict the likelihood of common diseases from symptom and biometric inputs using classification models.

Client-Server Architecture | *Java, Socket Programming, Networking*

Java implementation of a client-server communication system covering socket programming, request handling and protocol design.

TECHNICAL SKILLS

Programming Languages	C, Java, Python, JavaScript, TypeScript
Web Development	HTML5, CSS3, React.js, Next.js, Node.js, Express.js, Tailwind CSS, Three.js
Databases	MongoDB, SQL (MySQL)
AI & Data Science	NumPy, Pandas, scikit-learn, Machine Learning, Jupyter
Mobile	Android (Java), Kotlin, Android Studio
Tools & Platforms	Git, GitHub, Vercel, VS Code, Postman, Microsoft Excel, Canva

ACHIEVEMENTS & CERTIFICATIONS

Certifications: C Programming Course; Understanding Body Language. **Open Source:** 15+ public repositories on GitHub spanning web, mobile, AI/ML, systems and security domains, with multiple production deployments on Vercel.
